

What if we could cut abortions in half next year?

More than 2/3rds of women seeking an abortion agree: **They can't afford the baby.**

Half of women seeking an abortion come from a household in poverty.

The American Union supports an end to poverty through Universal Basic Income (UBI) of \$300/week for all adults, and \$100/week for all children.

UBI will cut demand for abortion.

The American Union - a union of swing voters - supports immediate passage of a legislative package that will:

- **End poverty**
- **End mass incarceration**
- **End the endless wars**

If we stand together as voters, we can deliver real solutions for all Americans.

Vote with the American Union

PAID MATERNAL LEAVE SAVES BABIES' LIVES

The US is the last industrialized country without paid maternity leave.

When newborns have more time with their mothers, they are more likely to reach their first birthday.

United States (2018)

European Union
(2018)

Infant mortality rate per 1,000 live births.

With 18 weeks paid leave, the US could bring our infant mortality rate down to the European Union average, saving the lives of almost 9,000 babies every single year.

That's one needless death every hour of every day.

America can do better, if we vote together as an American Union of swing voters.

LESS POLITICS. MORE POLICY.

The legislation is written – who will pass it?

**End poverty.
End mass incarceration.
End the endless wars.**

**We can address America's
problems.**

Paid for by American Union PAC and not authorized by any candidate or candidate's committee.
